The Information Security Management System (ISMS) set up by RGD will help ensuring the provision of secured and reliable services to the citizen and to other institutions, such as government departments.

The Management and staff of all levels are responsible for the protection of information and information processing assets of RGD. All staff are required to apply information security in accordance with the established information security policy and procedures of the organisation.

In this regard, the RGD commits to:

a. Communicate its ISMS Policy at all levels of the organisation and make it available to all its interested parties.

b. Comply to applicable laws and regulations and requirements of ISO 27001.

c. Adopt a risk management approach to identify and treat information security risks.

d. Perform information security risks assessments at planned intervals.

e. Ensure availability of business activities by minimising occurrence of security breaches and responding rapidly to security threats.

f. Ensure the control of ISMS documents.

g. Provide necessary resources to maintain the ISMS.

h. Regularly review its information security requirements to take into account the dynamic nature of external and internal business environments, and thus review its information security objectives, where applicable.

i. Ensure the continual improvement of its ISMS.
